Subject: APS Rate Case

4708

Hello,

I just saw a news report that APS is requesting yet another rate hike. This is absolutely unacceptable. They need to better manage the money they are already getting. We can not afford to keep paying more for power. We have a nuclear power plant, and this is supposed to be a generation source that is insulated from spikes in oil prices. We had a hydro power plant at Fossil Creek which APS decided to decommission, and this was insulated from oil prices. Again APS' bad management is leading to consumers picking up the tab.

APS needs to stop wasting money first and foremost! They could invest in technologies to reduce manual meter reading, etc. This would insulate consumers from the exorbitant fees being charged. Its getting to the point that electric needs to be deregulated so that we have a choice. APS has become a cash sucking beast. Please vote no to APS' proposed rate hike. We are still reeling from the last one!

Thank you,

Justin Gushard
